PERSONAL RESUME

I hold a degree on Software Engineering and have over 2 years of experience in software development, overall contributing to all stages of the project lifecycle. At Maxia Latam, I collaborated with a multidisciplinary team to develop software that reduced patient care and cancer treatment times by 75% in Panama. My strengths lie in proactivity, assertiveness, and a constant thirst for feedback, fostering effective teamwork and personal growth, aligned with the company's goals. I excel in versatile development, with hands-on experience in both backend and frontend technologies, ensuring adaptable and efficient solutions.

WORK EXPERIENCE

Cheil Worldwide

Process Analyst

Panama city, Panama

February 2024–July 2024

- Design and implementation of a Centralized Data Warehouse Model.
 - Redesign of the web/mobile data management application to fulfil the actual needs of end-users
 - Conducting and documenting interviews with the Field Force Management (FFM) department to capture current processes and address operational challenges.
 - Supporting data visualization efforts by creating Power BI dashboards for improved analysis and decision-making.

Maxia Latam
